PROFESSIONAL SUMMARY

Detail-oriented Data Analyst skilled in SQL, Python, Excel, and BI tools (Power BI, Tableau), with hands-on experience across the full analytics lifecycle: data wrangling, ETL, exploratory data analysis (EDA), and interactive dashboard design. Strong foundation in machine learning fundamentals, statistics, and stakeholder-focused data storytelling.

KEY SKILLS

- **Technical Skills:** SQL (MySQL, Oracle PL/SQL), Python (Pandas, NumPy), MS Excel (Pivot Tables, VLOOKUP), Tableau, Power BI (DAX, Power Query), Data Modeling, Data Wrangling & ETL, Data Visualization, Machine Learning, Deep Learning, Statistics, Exploratory Data Analysis (EDA).
- **Developer Tools & Libraries:** Power BI Desktop, Oracle SQL Developer, Visual Studio Code, Jupyter Notebook, Google Colab, GitHub, Matplotlib, Seaborn, Plotly.
- **Business & Soft Skills:** Stakeholder Communication, Data Storytelling, Cross-Functional Collaboration, Problem Solving, Analytical Thinking, Client-Focused Delivery, Presentation Skills.

EXPERIENCE

Fresher — Recent graduate seeking an entry-level Data Analyst role. No formal work experience yet; practical, hands-on skills demonstrated through the self-directed data analysis projects below.

PROJECTS

COVID-19 Pandemic Analysis

- Analyzed COVID-19 datasets covering **India** to identify trends in confirmed cases, recoveries, deaths, and vaccination rates.
- Cleaned and preprocessed large-scale datasets of 1800+ rows using Python (Pandas, NumPy), improving data quality and consistency.
- Performed EDA to compare regional infection rates and identify **3 key trend patterns** across time periods.
- Built interactive charts and dashboards using Matplotlib, Seaborn, and Plotly to visualize pandemic trends for non-technical audiences.
- Applied statistical analysis to evaluate pandemic impact across countries, supporting data storytelling for informed decision-making.

Music Store Database Analysis (SQL)

- Analyzed a relational Music Store database using advanced SQL (JOINs, GROUP BY, subqueries, window/aggregate functions) to evaluate sales performance and customer behavior.
- Identified top-selling products and top 10% high-value customers, informing targeted business recommendations.
- Uncovered sales trend patterns across 8 categories, contributing insights for inventory and marketing strategy.

Netflix Stock Prediction

- Analyzed historical Netflix stock data covering 4 years (February 2018–February 2022) to identify price and trading volume trends.
- Cleaned and transformed time-series stock data, then built interactive Power BI dashboards for trend monitoring.
- Visualized opening/closing price, trading volume, and daily price change metrics, enabling data-driven investment insight generation.

Online Store Annual Report Analysis (Excel)

- Analyzed an online store's annual sales data (Excel) covering 31,000+ transactions to evaluate performance and customer trends.
- Built an interactive sales dashboard using Pivot Tables, Power Query, and dynamic charts.
- Identified top-performing products and **80% revenue contributors**, supporting strategic business decisions.

EDUCATION

Kamaladevi College of Arts and Commerce, Kalyan, Mumbai
Bachelor of Science (B.Sc) in Computer Science and Engineering — CGPA 9.15
Jul 2022 – May 2025

CERTIFICATIONS

Data Analysis Certification - TheIscale
